RE: Comments on the Human Health Risk Assessment RAGS
Part D Standard Tables 2, 3, 5, and 6, OU 6, Site 12,
MCAS Cherry Point, NC
December 10, 1999

After reviewing the above mentioned document, I offer the following comments:

1. Tables 3.x, surface soil: According to Table 2.1, 4,6-Dinitro-2-methylphenol should be retained as a COPC in the Uncertainty Section, but it does not appear in the surface soil tables of Tables 3.x. Please correct.
2. Tables 3.x, surface water: According to Table 2.3, Isophorone should not be included as a COPC in the Uncertainty Section, but it does appear in the surface water tables of Tables 3.x. Please correct.
3. Tables 3.x, sediment: According to Table 2.4, hexachlorobenzene should be retained as a COPC in the Uncertainty Section, but it does not appear in the sediment tables of Tables 3.x. Please correct.
